INDEX OF SUBJECTS

A

Abuse
  child
    (editorial) (Baker), 169
    Neisseria gonorrhoeae infections, prepubertal (Potterat & others), 1
Amebiasis, homosexual men (William & others), 155
Ampicillin
  trimethoprim–sulfamethoxazole compared with for cure of nongonococcal urethritis (Prior & others), 62
  vaginitis caused by *Haemophilus vaginalis*, treatment results (Rodgers & others), 18
Anilingus, protozoal infections, enteric, in homosexual men (William & others), 155
Animal model(s), *Chlamydia trachomatis* experimental infection of chimpanzee (Jacobs & others), 132
Annular secondary syphilis, reinfection (Fiumara & Babinski), 160
Anorectum, *Neisseria gonorrhoeae* infections in homosexual men, frequencies of infection by culture site (McMillan & Young), 146
Antibiotic(s)
  ampicillin
    trimethoprim–sulfamethoxazole compared with for cure of nongonococcal urethritis (Prior & others), 62
    vaginitis caused by *Haemophilus vaginalis*, treatment results (Rodgers & others), 18
  benzathine penicillin G, syphilis, early latent, treatment (Fiumara), 85
  procaine penicillin G, systemic toxic reactions (Downham & others), 4
  spectinomycin, gonorrhea, anal, treatment (Felman & others), 158
  susceptibility patterns, gonococci from disseminated and local infections (Thompson & others), 127
  tetracycline, syphilis, early latent, treatment (Fiumara), 85
  trimethoprim, *Neisseria gonorrhoeae* strains resistant to, dihydrofolate reductase activity (Ho & others), 43
  trimethoprim–sulfamethoxazole, gonococcal urethritis not cured by single large dose (Prior & others), 62
Antibody(ies)
  hemagglutination treponemal test for syphilis (Wentworth & others), 103
  Neisseria gonorrhoeae detection by indirect enzyme-labeled antibody method (Lue & Ellner), 14
  Trichomonas vaginalis, indirect hemagglutination technique (Kuberski), 97
Antimetabolite(s), 5-fluorouracil, 1%, in 70% ethanol, in treatment of condylomas in preputial cavity (von Krogh), 137
Anus, gonorrhea, spectinomycin treatment (Felman & others), 158
Auxotype(s)
  gonococci
    (editorial) (Crawford), 165
    from disseminated and local infections (Thompson & others), 127

B

Broth culture(s), *Neisseria gonorrhoeae* detection by immunologic methods (Lue & Ellner), 14
Bubo(es), strumous, history (Kampmeier), 25

C

Chancre(s), syphilitic, variability (Chapel), 68
Chemical contraceptive(s), *Herpesvirus hominis*, types 1 and 2, inactivated by (Postic & others), 22
Child abuse
  (editorial) (Baker), 169
  Neisseria gonorrhoeae infections, prepubertal (Potterat & others), 1
Chimpanzee(s), *Chlamydia trachomatis* experimental infection of urethra and pharynx (Jacobs & others), 132
Chlamydia trachomatis
  experimental infection of chimpanzee urethra and pharynx (Jacobs & others), 132
  nongonococcal urethritis patients and sexual partners examined for (Paavonen & others), 93
  postgonococcal urethritis etiologies in homosexual and heterosexual men (Bowie & others), 151
  Reiter's syndrome association with infection with (Kousa & others), 57
  vaccine to prevent genital infection, potential for, review (Grayston & Wang), 73
Clinic(s)
  epidemiologic treatment policy
    gonorrhea (Judson & Maltz), 89
    gonorrhea (editorial) (Wiesner), 120
  gonorrhea diagnosis, system for monitoring quality of techniques (Judson), 141
  protozoal enteric infections in homosexual men (William & others), 155
  quality control, gonorrhea diagnosis (Judson), 141
Coagglutination, *Neisseria gonorrhoeae* detection in broth culture (Lue & Ellner), 14
Condyloma(s)
  1% 5-fluorouracil in 70% ethanol in treatment of therapeutically refractory condylomas in preputial cavity (von Krogh), 137
  lata, nasolabial (Fiumara & others), 112
  penile, therapeutically refractory, in preputial cavity, 1% 5-fluorouracil in 70% ethanol in treatment (von Krogh), 137
Congenital syphilis, transplacental spirochete transmission (editorial) (Hager), 122
Contraceptive(s), chemical, *Herpesvirus hominis*, types 1 and 2, inactivated by (Postic & others), 22
Corynebacterium vaginale, vaginitis, ampicillin treatment (Rodgers & others), 18
Counterimmunoelectrophoresis, *Neisseria gonorrhoeae* detection in broth culture (Lue & Ellner), 14
Culture(s)
  broth, *Neisseria gonorrhoeae* detection by immunologic methods (Lue & Ellner), 14
  medium for *Neisseria gonorrhoeae* (Mårdh & others), 10
  Neisseria gonorrhoeae
    homosexual men, frequencies of infection by culture site (McMillan & Young), 146
    quality control, clinic-based system (Judson), 141

D

Diagnosis(es)
  gonorrhea, quality control, clinic-based system (Judson), 141

urethritis, gram staining and first-voided urine sediment compared (Bowie), 39
syphilis, serologic methods compared (Wentworth & others), 103
Dihydrofolate reductases from trimethoprim- and sulfonamide-resistant strains of *Neisseria gonorrhoeae* (Ho & others), 43
Donné, M. A., *Trichomonas vaginalis* description, history (Kampmeier), 119

E

Entamoeba histolytica, infections, homosexual men (William & others), 155
Enteric infections, protozoal, in homosexual men (William & others), 155
Enzyme(s), dihydrofolate reductases from trimethoprim- and sulfonamide-resistant strains of *Neisseria gonorrhoeae* (Ho & others), 43
Enzyme-labeled antibody technique, *Neisseria gonorrhoeae* detection (Lue & Ellner), 14
Epidemiologic treatment policy
  gonorrhea
    (editorial) (Wiesner), 120
    in clinic (Judson & Maltz), 89
Epidemiology
  gonorrhea
    (editorial) (St. John & Curran), 81
    transmission (Yorke & others), 51
  Neisseria gonorrhoeae infections, prepubertal (Potterat & others), 1
Ethanol, 1% 5-fluorouracil in, in treatment of condylomas in preputial cavity (von Krogh), 137
Etiology(ies)
  urethritis
    nongonococcal, review (Bowie), 27
    postgonococcal, in homosexual and heterosexual men (Bowie & others), 151

F

Feces, protozoal infections, enteric, in homosexual men (William & others), 155
Fetus, syphilis, congenital, transplacental spirochete transmission (editorial) (Hager), 122
Fluorescent treponemal antibody-absorbed test, hemagglutination treponemal test for syphilis compared with (Wentworth & others), 103
5-Fluorouracil, 1%, in 70% ethanol, condylomas in preputial cavity treated with (von Krogh), 137

G

Giardia lamblia, infections, homosexual men (William & others), 155
Giardiasis, homosexual men (William & others), 155
Gonococcal urethritis, trimethoprim–sulfamethoxazole in single large dose does not cure (Prior & others), 62
Gonococcus(i)
  antibiotic susceptibility patterns, strains from disseminated and local infections (Thompson & others), 127
  auxotypes, strains from disseminated and local infections (Thompson & others), 127
  auxotyping (editorial) (Crawford), 165
  identification by Neisser, history (Kampmeier), 71
Gonorrhea
  anal, spectinomycin treatment (Felman & others), 158
  antibiotic susceptibility patterns of gonococci from disseminated and local infections (Thompson & others), 127
  auxotypes of gonococci from disseminated and local infections (Thompson & others), 127
  diagnosis, quality control, clinic-based system (Judson), 141
  epidemiologic treatment policy
    (editorial) (Wiesner), 120
    in clinic (Judson & Maltz), 89
  epidemiology (editorial) (St. John & Curran), 81
  homosexual men, frequency of infection by culture site (McMillan & Young), 146
  transmission, dynamics and control (Yorke & others), 51
  urethritis, postgonococcal, in homosexual and heterosexual men, etiologies (Bowie & others), 151
Gram stain, urethritis diagnosis (Bowie), 39

H

Haemophilus vaginalis, vaginitis, ampicillin treatment (Rodgers & others), 18
Harris, Ad, obituary, 83
Hemagglutination
  indirect, technique for *Trichomonas vaginalis* (Kuberski), 97
  treponemal test for syphilis (Wentworth & others), 103
Hematoma(s), pelvic, traumatic, *Mycoplasma hominis* infection (Burke & Madoff), 65
Herpes genitalis, syphilitic chancres, variability (Chapel), 68
Herpesvirus hominis, types 1 and 2, chemical contraceptive inactivation of (Postic & others), 22
Histology, pustules, secondary syphilis (Pariser & Mehr), 115
Homosexual men
  gonorrhea
    anal, spectinomycin treatment (Felman & others), 158
    frequency of infection by culture site (McMillan & Young), 146
  postgonococcal urethritis etiologies (Bowie & others), 151
  protozoal infections, enteric (William & others), 155

I

Indirect hemagglutination technique for *Trichomonas vaginalis* (Kuberski), 97
Infant(s), syphilis, congenital, treatment (editorial) (Hager), 122
Infection(s)
  Chlamydia trachomatis
    experimental, chimpanzee urethra and pharynx (Jacobs & others), 132
    genital, vaccine to prevent, potential for, review (Grayston & Wang), 73
  chlamydial
    evidence for venereal transmission (Paavonen & others), 93
    Reiter's syndrome association with (Kousa & others), 57
  enteric, protozoal, in homosexual men (William & others), 155
  gonococcal
    antibiotic susceptibility patterns of gonococci from disseminated and local (Thompson & others), 127
    auxotypes of gonococci from disseminated and local (Thompson & others), 127
    prepubertal (Potterat & others), 1
  Mycoplasma hominis, of traumatic pelvic hematoma (Burke & Madoff), 65
  protozoal, enteric, in homosexual men (William & others), 155
  Trichomonas vaginalis, indirect hemagglutination technique (Kuberski), 97
Infector number, gonorrhea epidemiology (Yorke & others), 51
Intestine(s), infections, protozoal, in homosexual men (William & others), 155
Isolation, gonococcal, medium for *Neisseria gonorrhoeae* (Mårdh & others), 10

L

Latent syphilis, early, treatment (Fiumara), 85
Lesion(s)
  annular, secondary syphilis (Fiumara & Babinski), 160
  syphilitic chancres, variability (Chapel), 68

Leukocyte(s), polymorphonuclear, gram staining and first-voided urine sediment in urethritis diagnosis (Bowie), 39
Lymph node(s)
buboes, strumous, history (Kampmeier), 25
syphilitic chancres, variability (Chapel), 68
Lymphadenopathy, syphilitic chancres, variability (Chapel), 68
Lymphatic gland(s), buboes, strumous, history (Kampmeier), 25
Lymphogranuloma inguinale, buboes, history (Kampmeier), 25
Lymphopathia venereum, buboes, history (Kampmeier), 25

M

Medium(a)
broth cultures, *Neisseria gonorrhoeae* detection by immunologic methods (Lue & Ellner), 14
Neisseria gonorrhoeae culture (Mårdh & others), 10
Microhemagglutination–*Treponema pallidum* test, hemagglutination treponemal test for syphilis compared with (Wentworth & others), 103
Minimal inhibitory concentration(s), gonococcal antibiotic susceptibility patterns, disseminated and local infections (Thompson & others), 127
Misuse, sexual, children (editorial) (Baker), 169
Model(s), animal, *Chlamydia trachomatis* experimental infection of chimpanzee (Jacobs & others), 132
Monitoring, gonorrhea diagnosis, quality, clinic-based system (Judson), 141
Mouth, nasolabial condylomata lata (Fiumara & others), 112
Mycoplasma hominis, infection of traumatic pelvic hematoma (Burke & Madoff), 65

N

Nasolabial condylomata lata (Fiumara & others), 112
Neisser, Albert, identification of gonococcus, history (Kampmeier), 71
Neisseria gonorrhoeae
broth culture (Lue & Ellner), 14
culture
medium (Mårdh & others), 10
sites, frequencies of infection in homosexual men (McMillan & Young), 146
dihydrofolate reductases from trimethoprim- and sulfonamide-resistant strains (Ho & others), 43
immunologic detection in broth cultures (Lue & Ellner), 14
prepubertal infections (Potterat & others), 1
spectinomycin treatment of anal gonorrhea (Felman & others), 158
trimethoprim-resistant, dihydrofolate reductase activity compared with that of sulfonamide-resistant strains (Ho & others), 43
trimethoprim–sulfamethoxazole inhibition in vitro related to cure of urethritis (Prior & others), 62
Neonate(s), syphilis, congenital, treatment (editorial) (Hager), 122
Nongonococcal urethritis
animal model for *Chlamydia trachomatis* infection (Jacobs & others), 132
Chlamydia trachomatis in patients and sexual partners (Paavonen & others), 93
etiology, review (Bowie), 27
Reiter's syndrome association with chlamydial infection (Kousa & others), 57
treatment, review (Bowie), 27
trichomonal infection in (Kuberski), 97
Ureaplasma urealyticum in patients and sexual partners (Paavonen & others), 93
Nose, nasolabial condylomata lata (Fiumara & others), 112

O

Obituary, Ad Harris, 83
Obstetrics, syphilis, congenital, transplacental transmission of spirochetes (editorial) (Hager), 122

P

Partner(s), sexual, of men with nongonococcal urethritis, examination for *Chlamydia trachomatis* and *Ureaplasma urealyticum* . (Paavonen & others), 93
Pediatrics
child abuse (editorial) (Baker), 169
Neisseria gonorrhoeae infections, prepubertal (Potterat & others), 1
syphilis, congenital, treatment (editorial) (Hager), 122
Penicillin(s)
benzathine penicillin G, syphilis, early latent, treatment, (Fiumara), 85
procaine penicillin G, systemic toxic reactions (Downham & others), 4
Penis, condylomas, therapeutically refractory, 1% 5-fluorouracil in 70% ethanol in treatment (von Krogh), 137
Pharmacokinetics, procaine penicillin G (Downham & others), 4
Pharynx
Chlamydia trachomatis infection, experimental, in chimpanzee (Jacobs & others), 132
Neisseria gonorrhoeae infections in homosexual men, frequencies of infection by culture site (McMillan & Young), 146
Placenta, syphilis, congenital, transplacental spirochete transmission (editorial) (Hager), 122
Polymorphonuclear leukocytes, gram staining and first-voided urine sediment in urethritis diagnosis (Bowie), 39
Postgonococcal urethritis, etiologies in homosexual and heterosexual men (Bowie & others), 151
Pregnancy, syphilis, congenital, transplacental transmission of spirochetes (editorial) (Hager), 122
Preputial cavity, condylomas, therapeutically refractory, 1% 5-fluorouracil in 70% ethanol in treatment (von Krogh), 137
Prostatitis (editorial) (Feit & Fair), 78
Protozoon(a), enteric infections in homosexual men (William & others), 155
Pustule(s), syphilis, secondary (Pariser & Mehr), 115

Q

Quality control, gonorrhea diagnosis, clinic-based system (Judson), 141

R

Rectum, *Neisseria gonorrhoeae* infections in homosexual men, frequencies of infection by culture site (McMillan & Young), 146
Reductase(s), dihydrofolate, from trimethoprim- and sulfonamide-resistant strains of *Neisseria gonorrhoeae* (Ho & others), 43
Reinfection secondary syphilis, annular (Fiumara & Babinski), 160
Reiter's syndrome, chlamydial infection association (Kousa & others), 57
Research training, Venereal Diseases Research Fund (editorial) (Hines & Knox), 124

S

Screening
gonorrhea, asymptomatic, culture of cervical specimens (Yorke & others), 51
syphilis, history (Kampmeier), 163

Secondary syphilis
annular, reinfection (Fiumara & Babinski), 160
nasolabial condylomata lata (Fiumara & others), 112
pustules (Pariser & Mehr), 115
Seroconversion
nongonococcal urethritis, *Chlamydia*-positive (Paavonen & others), 93
syphilis, early latent (Fiumara), 85
Serodiagnostic reaction in syphilis, history (Kampmeier), 163
Seroepidemiology, *Trichomonas vaginalis* infections (Kuberski), 97
Serology
syphilis, hemagglutination treponemal test for (Wentworth & others), 103
Trichomonas vaginalis, indirect hemagglutination technique (Kuberski), 97
Sexual misuse, children (editorial) (Baker), 169
Skin
syphilis, secondary
annular, reinfection (Fiumara & Babinski), 160
pustules (Pariser & Mehr), 115
Spectinomycin, gonorrhea, anal, treatment (Felman & others), 158
Spermicide(s), *Herpesvirus hominis*, types 1 and 2, inactivation by (Postic & others), 22
Susceptibility pattern(s), antibiotic, gonococci from disseminated and local infections (Thompson & others), 127
Syphilis(itides)
chancres, variability (Chapel), 68
congenital, transplacental spirochete transmission (editorial) (Hager), 122
diagnosis, serologic methods compared (Wentworth & others), 103
early latent, treatment (Fiumara), 85
hemagglutination treponemal test for (Wentworth & others), 103
latent, early, treatment (Fiumara), 85
secondary
annular, reinfection (Fiumara & Babinski), 160
nasolabial condylomata lata (Fiumara & others), 112
pustules (Pariser & Mehr), 115
serodiagnostic reaction, history (Kampmeier), 163
serologic methods for diagnosis compared (Wentworth & others), 103
Systemic toxic reactions, procaine penicillin G (Downham & others), 4

T

Tetracycline, syphilis, early latent, treatment (Fiumara), 85
Toxicity, procaine penicillin G, systemic toxic reactions (Downham & others), 4
Trachoma, vaccine studies, review (Grayston & Wang), 73
Transmission
chlamydial infection, evidence for venereal mode (Paavonen & others), 93
gonorrhea, dynamics and control (Yorke & others), 51
transplacental, spirochetes in congenital syphilis (editorial) (Hager), 122
Transplacental transmission, spirochetes in congenital syphilis (editorial) (Hager), 122
Treatment policy(ies)
epidemiologic
gonorrhea (editorial) (Wiesner), 120
gonorrhea, in clinic (Judson & Maltz), 89
Trichomonas vaginalis
Donné description, history (Kampmeier), 119
infections
hemagglutination technique, indirect (Kuberski), 97
men, indirect hemagglutination technique (Kuberski), 97
Trimethoprim, medium for *Neisseria gonorrhoeae* containing (Mårdh & others), 10
Trimethoprim-resistant *Neisseria gonorrhoeae*, dihydrofolate reductase from compared with dihydrofolate reductase from sulfonamide-resistant strains (Ho & others), 43
Trimethoprim–sulfamethoxazole, gonococcal urethritis not cured by single large dose (Prior & others), 62

U

Ulcer(s), syphilitic chancres, variability (Chapel), 68
Ureaplasma urealyticum
nongonococcal urethritis patients and sexual partners examined for (Paavonen & others), 93
postgonococcal urethritis etiologies in homosexual and heterosexual men (Bowie & others), 151
Urethra
Chlamydia trachomatis infection, experimental, in chimpanzee (Jacobs & others), 132
Neisseria gonorrhoeae infections in homosexual men, frequencies of infection by culture site (McMillan & Young), 146
Urethritis
diagnosis
first-voided urine sediment and gram staining compared (Bowie), 39
gram staining and first-voided urine sediment compared (Bowie), 39
gonococcal, trimethoprim–sulfamethoxazole in single large dose does not cure (Prior & others), 62
nongonococcal
animal model for *Chlamydia trachomatis* infection (Jacobs & others), 132
Chlamydia trachomatis in patients and sexual partners (Paavonen & others), 93
etiology, review (Bowie), 27
Reiter's syndrome association with chlamydial infection (Kousa & others), 57
treatment, review (Bowie), 27
trichomonal infection in (Kuberski), 97
Ureaplasma urealyticum in patients and sexual partners (Paavonen & others), 93
postgonococcal, etiologies in homosexual and heterosexual men (Bowie & others), 151
Urine, first-voided, sediment, urethritis diagnosis (Bowie), 39

V

Vaccine(s)
Chlamydia trachomatis genital infection, potential for, review (Grayston & Wang), 73
trachoma, trial, review (Grayston & Wang), 73
Vaginitis
Corynebacterium vaginale, ampicillin treatment (Rodgers & others), 18
gonococcal, prepubertal (Potterat & others), 1
Haemophilus vaginalis, ampicillin treatment (Rodgers & others), 18
